THATCH ROOFING MATERIAL

General information

- Thatch roofing material is made from Alang Alang grass
- Alang Alang grass is native to Indonesia
- The grass is hand lashed to bamboo battens 2.1 mts in length
- The thatch does not require lining, as the grass when installed appropriately is water proof
- Alang Alang grass thatch is very decorative both from an external and internal perspective
- The edge of the thatch can be finished in various ways including cut into a straight line, partially trimmed or left with the natural fringe effect
- Alang Alang grass thatching will change colour to a silvery/grey shade overtime, however the underside will remain similar to that of its original installation colour
- Alang Alang grass thatch is very functional and can be used for garden pavilions, over or beside swimming pools, over spas and entertainment areas and has various uses within resorts and restaurants

We can assist you with the calculation of how many lengths of thatch you will require. To calculate this we will require the size of the pavilion you are building, along with the pitch of the roof (we recommend a minimum of 30 degrees, with the preferred pitch being 45 degrees). Please leave this information with nursery staff who will get back to you with details on how many lengths of thatch you will need to purchase.

Thatch roofing costs

2.1 mt length - \$20.95*
- \$19.95* (when you purchase between 30 – 49 lengths)
- \$18.95* (when you purchase between 50 – 79 lengths)
- \$17.95* (when you purchase 80 or more lengths)

1.8mt (hip cover) - \$42.95*

Display pavilion

5mt x 4mt (approx 100 x 2.1 mt lengths & 6 x 1.8mt hip covers)

** Please note that valued customer card vouchers cannot be earned or redeemed on thatch purchases.
No discount offers apply to thatch roofing materials.*
